

WHMIS Training Certificate

Employer's Responsibilities

Make sure the training is satisfactory:

It is your responsibility under the WHMIS Regulations to make sure each employee who works with or near controlled products is trained to your satisfaction.

Danatec's WHMIS Online course covers the topics listed on the certificate below. You are required to train employees about the hazards, safe handling and emergency procedures for the specific controlled products in the workplace.

Complete and sign the certificate:

There is no legal requirement for you to issue a certificate to your employees, but if you choose to do so, fill in the details below. The expiry date is optional, as the regulations do not specify a time period for retraining. There is a place for you to sign and for the employee to sign.

List additional topics or details of training:

Add any additional WHMIS-related training on the back of the certificate.

Printing Your Certificate

You can choose to print your certificate on thicker stock paper, as well as printing in color. Cut your certificate out and fold in half.
